## SKILLS

---

ORGANIZATIONAL	Technical design & management   Agile Development   Stakeholder Management   Business Development
LANGUAGES	Python   MATLAB   SQL   LaTeX   HTML/CSS
TOOLING	Git   Docker   AWS   Jenkins   Atlassian Suite   PyCharm   Jupyter   Protobuf   QGIS
PYTHON	<ul style="list-style-type: none"><li>· Package creation &amp; environment management: <code>pip</code>, <code>setuptools</code>, <code>poetry</code>, <code>virtualenv</code>, <code>pyenv</code>, <code>cookiecutter</code></li><li>· Software testing &amp; tooling: <code>loguru</code>, <code>pyyaml</code>, <code>confuse</code>, <code>dataclasses</code>, <code>nltk</code>, <code>pdoc3</code></li><li>· Testing frameworks &amp; code standards: <code>pytest</code>, <code>black</code>, <code>unittest</code>, <code>snapshottest</code>, <code>mypy</code></li><li>· Data management: <code>PySpark</code>, <code>Pandas</code>, <code>sqlalchemy</code>, <code>Scrapy</code>, <code>Kedro</code></li><li>· Data analysis: <code>NumPy</code>, <code>SciPy</code>, <code>scikit-learn</code>, <code>StatsModels</code>, <code>opencv</code>, <code>Pillow</code></li><li>· Data visualization: <code>Seaborn</code>, <code>Plotly</code>, <code>Matplotlib</code></li><li>· Geospatial &amp; scientific computing: <code>pymap3d</code>, <code>pint</code>, <code>Shapely</code>, <code>geomag</code>, <code>libpostal</code></li></ul>

## EDUCATION

---

2011 – 2018	<b>Cornell University</b> – Ph.D. in Applied Physics, Biomedical Engineering minor, 3.90 / 4.00
2007 – 2011	<b>Penn State University</b> – B.S. with Honors in Physics, Biomedical Engineering & Mathematics minors, 3.97 / 4.00

## EXPERIENCE

---

2021 – PRESENT	<b>Senior Machine Learning Engineer</b> <u>Altana AI</u> , <i>Brooklyn, NY</i> <ul style="list-style-type: none"><li>· Develop, train, and deploy NLP models for classification and knowledge graph creation in supply chain domain</li></ul>
2018 – 2021	<b>Data Scientist, Chief Engineer</b> <u>MORSE Corp.</u> , <i>Cambridge, MA</i> <ul style="list-style-type: none"><li>· Led team of 12 data scientists and software engineers developing unsupervised anomaly detection algorithms</li><li>· Deployed AI algorithms to AWS cloud environments and realtime, protobuf-interfaced pipelines</li><li>· Developed and delivered sales pitch resulting in over \$10M contract for AI services</li><li>· Designed company-wide best practices for Python development and led associated training sessions</li><li>· Contributed to company's first open-source project: <u>Snappershot</u></li><li>· Designed and built algorithms for physical modeling, optimization, and geospatial anomaly detection</li><li>· Analyzed airdrop data to evaluate algorithm performance and optimize parameters of physical model</li><li>· Led team of three engineers to create a web application with Python backend and JavaScript React frontend</li><li>· Developed a suite of internal Python packages for physical modeling of airdrop systems used across programs</li><li>· Developed data model with associated API and SQLite database for cross-program data</li><li>· Planned and supervised data collection for airdrop test campaigns, coordinating with customers and staff</li><li>· Conducted technical screens and in-person interviews for hiring data scientists and technical leads</li><li>· Clearance: Top Secret</li><li>· Featured in <u>BuiltIn Boston</u></li></ul>
2018	<b>Data Science Fellow</b> <u>Insight</u> , <i>Boston, MA</i> <ul style="list-style-type: none"><li>· Extracted and cleaned data (continuous, categorical, text) from 40-table relational database using Python and PostgreSQL</li><li>· Modeled trial dropout rates using linear regression and random forests in Python</li><li>· Deployed <u>online app via Dash/Heroku</u> to predict the number of patients that will drop out of a clinical trial</li></ul>

## PROJECTS

---

2012 – 2018	<b>Injury-induced cellular dysfunction in articular cartilage (doctoral research)</b> <i>Cornell University, Ithaca, NY</i> <ul style="list-style-type: none"><li>· Built custom mechanical testing stage, interfacing with optical microscopy to measure soft tissue properties</li><li>· Analyzed multi-dimensional images (~20x5 GB) in MATLAB &amp; Python to segment, track, &amp; classify cell behavior</li><li>· Quantified relationship between cell dysfunction and treatment using mixed-effects regression (linear, logistic)</li></ul>
-------------	--

- Presented research quarterly in small-group meeting and at seven scientific conferences
- Mentored five researchers and cultivated collaborations with veterinary surgeons and biomedical engineers

#### 2017 **GUI for automated segmentation and classification of microscopy images (doctoral research)**

*Cornell University, Ithaca, NY*

- Developed custom image segmentation and classification algorithm based on the watershed transform
- Deployed image algorithm as a portable GUI using MATLAB, enabling non-technical collaborators to utilize vision techniques ([GUI and tutorial](#))
- Published training tutorial and distributed GUI to collaborators using GitHub

#### 2015 – 2017 **4D flow behavior of protective glass coatings (doctoral research)**

*Corning Inc., Corning, NY & Cornell University, Ithaca, NY*

- Implemented N-dimensional Barnes smoothing interpolation in MATLAB, extending previously 2D algorithm
- Compiled and analyzed large, multi-dimensional confocal microscopy data sets using MATLAB and Python
- Collaborating with Corning Inc., coordinating quarterly presentations and final reports

#### 2016 **WXPB radio “A to Z” marathon playlist analysis (personal project)**

*Ithaca, NY*

- Scraped playlist metadata from web and linked to additional open database APIs using Python
- Cleaned data and calculated summary statistics using Python
- Created and shared interactive visualization using Tableau and Twitter (links: [Tableau Viz](#), [News coverage](#))

#### 2009 – 2011 **X-ray dosimeters for diagnostic breast cancer imaging (undergraduate thesis)**

*University of Pennsylvania, Philadelphia, PA*

- Designed, constructed, and studied the response of a custom X-ray dosimeter
- Simulated measurement biases of existing dosimeters from first-principles using MATLAB

### LEADERSHIP EXPERIENCE & OUTREACH

---

- 2016 – 2017 *Homemade Microscope Outreach* – Design & produce module teaching high school students about imaging
- 2015 – 2016 *Student Employee* – Cornell McGovern Center for Venture Development in the Life Sciences
- 2014 – 2015 *Advisory Board Member* – NIH Broadening Experiences for Scientific Training program at Cornell
- 2009 – 2011 *President* – Penn State University Society of Physics Students

### SELECT AWARDS & FELLOWSHIPS

---

- 2016 - 2018 NIH Individual F31 Predoctoral Fellowship Grant
- 2012 - 2015 NSF Graduate Research Fellowship
- 2011 - 2012 Cornell Presidential Life Science Fellowship (1 year graduate training & stipend)
- 2009 Goldwater Scholarship
- 2009 American Association of Physicists in Medicine Undergraduate Fellowship
- 2007 - 2011 Penn State Braddock Scholarship (4 years full tuition, room & board)

### SELECT RESEARCH PRESENTATIONS

---

- 2014 – 2017 Poster or Podium Presentation, Orthopaedic Research Society
- 2014 Podium presentation, Society of Rheology
- 2013 Poster presentation, Gordon Research Conference: Soft Condensed Matter Physics

### PATENT

---

- 2017 “Buckling technique to determine tissue engineered construct readiness,” U.S. Provisional Application, pending.

### SELECT PUBLICATIONS
